TECHNICAL SPECIFICATION

EarthSmart[™] Eclipse is an 8 mil (203μ) white PP blockout banner media. It is a high-performance, copolymer film with high tensile strength that is a cost-effective alternative to traditional PVC banner. This light-blocking print media is dimensionally stable and is compatible with traditional sewing, grommeting and heat welding (not compatible with RF welding). It offers double-sided printability and can be recycled in commercial plastics recycling programs, where available.

- IDEAL FOR BANNER STAND GRAPHICS, HANGING BANNERS AND WINDOW GRAPHICS
- SUITABLE FOR INTERIOR AND EXTERIOR USE

Printer Compatibility
- UV

PRODUCT CHARACTERISTIC

| | |
|---------------------------|------------------------------------------------------------|
| Film Thickness | 8 mil (200μ) |
| Finish | Satin |
| UV Protection Factor | Not Applicable |
| Outdoor Durability | 1 Year |
| Service Temperature Range | -4°F to 146°F (-20°C to 63°C) |
| Shelf Life | 1 year |
| Storage Conditions | 59°F to 72°F (15°C to 22°C); 50 - 55% Relative Humidity |

TEST DATA

| Property | Test Method | Typical Results | | Units |
|---------------------------|-------------|-----------------|----------|-------|
| Elongation at Break | ASTM D882 | >400 MD | >400 TD | % |
| Tensile Strength at Break | ASTM D882 | 3,100 MD | 2,900 TD | psi |
